DETAILED ACTION

This application is a CIP of 09/571,553.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 2, 2002 has been entered.

The amendment filed December 2, 2002, amending claims 63-110 and adding claim 112, has been entered.

Claims 1-18 and 63-112 are pending.

Election/Restrictions

Claims 1-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1652

Claims 63-110 and 112 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 63-110 and 112, it appears that applicants are referring to the amino acid position of a polypeptide. However, without the recitation of the SEQ ID NO, it is unclear which amino acid residue corresponds to a particular position of the wildtype polypeptide.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 63-64, 66, 71 and 112 are rejected under 35 U.S.C. 102(e) as being anticipated by Delagrave et al.

Delagrave et al. (U.S. Patent No. 6,498,026) teach variants of the wildtype D. dendroides galactose oxidase having a mutation at position 494 and 195 (Columns 69-70, claims 1-7 and Columns 1-13). Therefore, the teaching of Delagrave et al. anticipates claims 63-64, 66, 71 and 112.

Allowable Subject Matter

Claim 111 is allowed.
